EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 13, line 1, replace "2" with ---1---.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: Regarding claim 1, in GB '708 the end sections 201' closing the rotor slots 201 (Fig.1a) are machined away after the casting step (p.3, lines 64-69). The resultant product is shown in Fig.1b. Thus, GB '708 does not teach the claimed "slots closed at said end section near the outer periphery of said body". Applicant's arguments with respect to the rejection of claims 1, 12 and 16 over Uchida or Obara, in view of Tajima, have been fully considered and are persuasive since it appears that the radially-aligned magnets in the base references Uchida and Obara would run contrary to Tajima's explicit teaching that the ratio $R1/R0 > 0.85$. This ratio essentially limits the location of the rotor magnets in Tajima to the outer periphery of the rotor.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
